

# JLTACADEMY

Construction Insurance  
and Risk Management Training Course

LONDON SUMMER COURSES

10 – 12 July 2019

## JLTACADEMY

# CONSTRUCTION INSURANCE AND RISK MANAGEMENT TRAINING COURSE

---

### INTRODUCTION TO THE JLT CONSTRUCTION ACADEMY

Now in its 10<sup>th</sup> year, the JLT Construction Academy offers delegates the opportunity to gain further knowledge, skills and experience in relation to the nuances of construction insurance issues and coverage.

Our course is structured to encourage shared knowledge and learning. This translates into the use of practical, real life learning examples and promotes open discussions and debate amongst the delegates. In tailoring our courses we concentrate on building the specific skills our delegates require to better tackle their day-to-day roles. This has allowed past delegates to achieve not only their own career goals but the goals of their organisation.

### PRESENTED BY JLT CONSTRUCTION

We deliver first class training through our insurance and industry specialists.

JLT Construction has many years' experience in delivering insurance and risk management training and our success is measured by the high standards we set both our specialists and delegates. We look forward to working with you and welcoming you to the 2019 Academy.

### CONSTRUCTION COURSE

JLT is the largest specialist construction broker in the London market. For over 30 years JLT Construction has worked in partnership with our clients to develop and deliver training and education which enhance their understanding of risk transfer and insurance.

With a team of over 135 construction insurance professionals in London, we have designed the Construction Academy to consolidate those areas with which we most commonly assist clients. We have developed a three day training course which provides delegates with insight into areas including contractual insurance clauses, the types of construction insurance available, how construction insurers underwrite risks, maximising claims payments and much more.

### WHO SHOULD ATTEND?

The course has been designed for delegates with less than five years risk and insurance experience or those that have recently moved to the industry and are looking for a deeper understanding of construction insurance.

Delegates will ideally have a basic knowledge of insurance and the construction industry and work within the insurance or risk management team of a construction company, or a company who has major on-going construction investment.

10 – 12 July 2019

# COURSE CONTENT

## 2019 CONSTRUCTION ACADEMY

---

Throughout the three days JLT specialists and industry experts will provide attendees with insight into areas including:

- Understanding the insurance requirements of a contract
- An introduction to construction insurance: key risks and insurance policies
- The importance of the underwriting submission
- The fundamentals of delay in start-up cover
- What cover is really available for defects?
- Owner controlled insurance programmes vs. contractor controlled insurance programmes
- Transferring risk for major civil projects
- What is erection all risk insurance?
- Underwriting procedures: what drives the price?
- Managing the claims process
- Global insurance market update
- Cyber insurance risks
- Environmental insurance risks
- Terrorism & Political risks for construction projects
- Lloyds tour (optional).

The format is workshop based to provide attendees with an opportunity to apply their learning throughout the Academy.

### BY ATTENDING THE COURSE DELEGATES WILL:

- Gain a deeper insight and understanding of insurance available in and applicable to the construction industry
- Develop practical skills that can be used immediately to benefit their current working practice
- Understand how to best position the risks when presenting to insurers.

### COURSE DATES

The course will last for three days from Wednesday 10 July to Friday 12 July 2019.
